

EIGHT MISTAKES THAT CAN UPEND YOUR RETIREMENT

Pursuing your retirement dreams is challenging enough without making some common, and very avoidable, mistakes. Here are eight big mistakes to steer clear of, if possible.

1. NO STRATEGY

Yes, the biggest mistake is having no strategy at all. Without a strategy, you may have no goals, leaving you no way of knowing how you'll get there—and if you've even arrived. Creating a strategy may increase your potential for success, both before and after retirement.

2. FREQUENT TRADING

Chasing “hot” investments often leads to despair. Create an asset allocation strategy that is properly diversified to reflect your objectives, risk tolerance, and time horizon; then make adjustments based on changes in your personal situation, not due to market ups and downs.¹

3. NOT MAXIMIZING TAX-DEFERRED SAVINGS

Workers have tax-advantaged ways to save for retirement. Not participating in your employer's 401(k) may be a mistake, especially when you're passing up free money in the form of employer-matching contributions.²

4. PRIORITIZING COLLEGE FUNDING OVER RETIREMENT

Your kids' college education is important, but you may not want to sacrifice your retirement for it. Remember, you can get loans and grants for college, but you can't for your retirement.

5. OVERLOOKING HEALTHCARE COSTS

Extended care may be an expense that can undermine your financial strategy for retirement if you don't prepare for it.

6. NOT ADJUSTING YOUR INVESTMENT APPROACH WELL BEFORE RETIREMENT

The last thing your retirement portfolio can afford is a sharp fall in stock prices and a sustained bear market at the moment you're ready to stop working. Consider adjusting your asset allocation in advance of tapping your savings so you're not selling stocks when prices are depressed.³

7. RETIRING WITH TOO MUCH DEBT

If too much debt is bad when you're making money, it can be deadly when you're living in retirement. Consider managing or reducing your debt level before you retire.

8. IT'S NOT ONLY ABOUT MONEY

Above all, a rewarding retirement requires good health, so maintain a healthy diet, exercise regularly, stay socially involved, and remain intellectually active.

1. The return and principal value of stock prices will fluctuate as market conditions change. And shares, when sold, may be worth more or less than their original cost. Asset allocation and diversification are approaches to help manage investment risk. Asset allocation and diversification do not guarantee against investment loss. Past performance does not guarantee future results.

2. Distributions from 401(k) plans and most other employer-sponsored retirement plans are taxed as ordinary income and, if taken before age 59½, may be subject to a 10% federal income tax penalty. Generally, once you reach age 70½, you must begin taking required minimum distributions.

3. The return and principal value of stock prices will fluctuate as market conditions change. And shares, when sold, may be worth more or less than their original cost. Asset allocation is an approach to help manage investment risk. Asset allocation does not guarantee against investment loss. Past performance does not guarantee future results.
